

## AJEET M. (PowerBI Expert)

### SUMMARY

- A Database Programmer, specializing in MS SQL Server and Oracle with 10+ years of experience in DB design process including requirements definition, prototyping, proof of concept, design, testing and maintenance. Good experience on Different database languages & Reporting tools like Power BI etc. Having knowledge of SSAS, SSRS and SSIS packages, Replication, DB Jobs etc. also I have ability to quickly learn new concepts and I am a team player with good technical, analytical & communication skills.

### TECHNICAL SKILLS

<b>Database</b>	MS SQL Server 2005/2008/2012/2014/2016, MySQL, Oracle 11g, 12c, MongoDB, PostgreSQL
<b>ETL Tools</b>	SSIS
<b>Reporting Tools</b>	Power BI, SSRS, Jasper
<b>Operating Systems</b>	Windows 10, Windows 8, Windows XP, DOS
<b>Strong Areas</b>	MS SQL Server 2008/2012/2014/2016, Power BI, SSIS, MySQL

### PROJECT SUMMARY

- **Axis Bank (Fastag)**
  - Platform** : Sql Server 2012, Asp.net (MVC) /C#
  - Project Summary** : Fastag enables automatic deduction of toll charges and let you pass through toll plaza without stopping for cash transaction. Fastag is linked to a prepaid account from which amount gets deducted.
  - Role & Responsibility** :- Design & Development Database, Deployment, Production Support etc.....
- **PMS System**
  - Platform** : Sql Server 2014, SSIS
  - Project Summary** : Manage Different types of PMS system via SSIS. Generate different types of reports for customers.
  - Role & Responsibility** :- Requirement understanding, DW design, Deployment, Production Support etc.....
- **eGRaNT CRM**
  - Platform** : Sql Server 2019, SSIS, Power BI
  - Project Summary** : This is a CRM system where the CRM owner can publish the tender applications, then multiple vendors fill those application online and CRM users assist the vendors. Then after when vendor got that project & start the project, he needs to submit the progress plan & progress report as per the plan, & also request the payment as per the milestone achieve in the submitted progress report.
  - Role & Responsibility** :- Requirement understanding, DW design, ETL & Power BI reports design & development, Deployment, Production Support etc.....
- **Retailers App**
  - Platform** : Mysql, Power BI, Microservices(Java)
  - Project Summary** : This app will provide the transparency and direct communication between Retailer Manufacturer. This is a framework that can interface retailers to the distributors, who will deal with their inventories better by using present market situation. A system that provides retailers with more benefits, profits, best discounts and schemes, good range

of products in required quantity and respecting their loyalty at every level of supply chain is required for efficient working of small-scale brands.

**Role & Responsibility :-** Design & Development Database, Deployment, Production Support etc.....

➤ **Ndtv Sports Website**

**Platform** : Oracle, Sql Server 2008, SSIS, My Sql, Asp.net (MVC) /C#

**Online Link** : <http://sports.ndtv.com>

**Project Summary** : This is only sports website in India which contain all sports data. It contain all latest news, blogs, interview etc. This portal contains two DB sql server for CMS & Oracle for front end, Data is migrated from sql server to oracle through replication.

**Role & Responsibility :-** Design & Development Database, Deployment, Production Support etc.....

➤ **Indian Super League (ISL) Website**

**Platform** : Sql Server 2008, Asp.net (MVC) /C#

**Online Link** : <http://www.indiansuperleague.com>

**Project Summary** : This is the official website for ISL. it contain all latest news, interview, photos, videos, player profiles, live scorecard etc. In this website we use Sql Server 2008 for backend.

**Role & Responsibility :-** Design & Development Database, Deployment, Production Support etc.....

➤ **Star Sports & Vodafone Star**

**Platform** : Sql Server 2008, SSIS, Asp.net/C#

**Online Link** : <http://m.starsports.com/> & <http://vodafone.starsports.com/>

**Project Summary** : This is a web based project, user can subscribe different type of sports pack with different price which contain sports related videos, news, wallpapers, galleries. Also we have track all user activity on this website in our DB. generate different type of reports like revenue, subscription, package wise subscription, operator wise subscription & some other report for user data analysis. Also we have create CMS for maintain the star sport website.

**Role & Responsibility :-** Design & Development Database, Deployment, Production Support etc.....

➤ **Trace My Run (Puma) Website**

**Platform** : Sql Server 2008, Asp.net (MVC) /C#

**Online Link** : <http://www.tracmyrun.com>

**Project Summary** : This is a website which contain all marathon races data organized by Puma, also user can register this website & submit their timing of non puma marathon races. he get points according to some rules & he can compare himself with other runners & get how much he has improve his running.

**Role & Responsibility :-** Design & Development Database, Deployment, Production Support etc.....

➤ **F1 Pulse Website**

**Platform** : Sql Server 2008, Asp.net/C#

**Online Link** : <http://www.F1pulse.com>

**Project Summary** : This is the website which contain all latest news, interview, photos player profiles, live formula 1 races data & commentary & also historical data of F1 etc. In this website we use Sql Server 2008 for backend.

**Role & Responsibility :-** Design & Development Database, Deployment, Production Support etc.....

➤ **Cricinfo Cricket Fantasy game**

**Platform** : Oracle, Asp.net/C#

**Online Link** : <http://games.espnricinfo.com/fantasy/homepage.aspx>

**Project Summary** : This is a cricket fantasy game, In this game user create his own team earn points according to player performing in real game and compete to other user's. also find his rank in leader board, player stats in according to series. I am handling back-end module of this project.

**Role & Responsibility :-** Design & Development Database, Deployment, Production Support etc.....

➤ **Star MVP (Most Valuable Player)**

**Platform** : Sql Server 2008, Asp.net/C#

**Online Link** : [Mvp.starsports.com](http://Mvp.starsports.com)

**Project Summary :** In this project we find the most valuable player according to his performance of the Match, Series and Year, we calculate some factor's of batting, bowling and fielding like presser, accuracy, power hitting etc. to find mvp. I have work in Database module of this project.

**Role & Responsibility :-** Design & Development Database, Deployment, Production Support etc.....

➤ **Cricinfo Cricket Predictor game**

**Platform :** Oracle, Asp.net/C#

**Project Summary :** This is a Facebook app for prediction of cricket game, in this game user predict some match related question's and get points for every right ans. I have design and develop of database module of this project.

**Role & Responsibility :-** Design & Development Database, Deployment, Production Support etc.....

➤ **Formula 1 scoring & commentary interfaces and MotoGP scoring & commentary interface**

**Platform :** MS-SQL Server 2008

**Project Summary :** This project is use to provide all information about Formula1 race's like live scoring, live commentary and events of that particular race. The scoring interface is use to live scoring of formula1 races. The commentary interface is use to provide the live commentary of formula 1 races, this commentary interface is online interface. Event interface is use to enter all the event's of that particular live race. It also includes interfaces to generate XML of Drivers and Team's standing's etc. I have work in Database module of this project.

**Role & Responsibility :-** Design & Development Database, Deployment, Production Support etc.....

➤ **Other Projects**

- 1) Sony Liv Football Fantasy
- 2) Sony Liv Football Predictor
- 3) Sony Liv Cricket Predictor
- 4) ITPL (Tennis) Scoring interface
- 5) Kabaddi Scoring interface
- 6) Hockey Scoring Interface
- 7) Cricinfo F1 tracker
